By The Blood Of Our

Blood is a body fluid in humans and other animals that delivers necessary substances such as nutrients and oxygen to the cells and transports metabolic waste products away from those same cells.. In vertebrates, it is composed of blood cells suspended in blood plasma. Plasma, which constitutes 55% of blood fluid, is mostly water (92% by volume), and contains proteins, glucose, mineral ions ...

BloodBanker.com- Give Blood for Money or Glory!

There are so many stories about why people begin donating blood. Giving blood is an opportunity to give to the community in a very real way. Even though the process is simple and doesn't require much time at all, the fact is that without regular blood donors, there are people in our community who wouldn't be alive.

Donate Blood - America's Blood Centers

Blood pressure (BP) is the pressure of circulating blood on the walls of blood vessels. Most of this pressure is due to work done by the heart by pumping blood through the circulatory system. Used without further specification, "blood pressure" usually refers to the pressure in large arteries of the systemic circulation. Blood pressure is usually expressed in terms of the systolic pressure ...
