Dark Shadows On The Moon

Apollo astronauts noticed something very strange about shadows on the moon. The moon is utterly familiar. We see it all the time, in the blue sky during the day, among the stars and planets at night. Every child knows the outlines of the moon's lava seas: they trace the Man in the Moon or, sometimes, a Rabbit.

Dark Shadows On The Moon by John B. Ford - Goodreads

Shadows on the Moon. Your shadow's inner light comes from the sky. Molecules in Earth's atmosphere scatter sunlight (blue more than red) in all directions, and some of that light lands in your shadow. Look at your shadowed footprints on fresh sunlit snow: they are blue! Without the blue sky, your shadow would be eerily dark,...

Dark Shadows. Shadows could also be mischievous: Apollo 12 astronauts Pete Conrad and Al Bean landed in the Ocean of Storms only about 600 yards from Surveyor 3, a robotic spacecraft sent by NASA to the moon three years earlier. A key goal of the Apollo 12 mission was to visit Surveyor 3, to retrieve its TV camera,...

Today's episode of Dark Shadows did not air on July 21st, 1969, because over the weekend, a couple of crazy kids from the Kennedy Space Center went and landed a rocket ship on the entire moon. This amazing stunt was picked up by the press somehow — I guess they had viral videos back then — and there was continuous commercial-free coverage ...

Vanilla Ninja - Shadows On The Moon

Shadows on the moon is a beautifully woven tale which I thought was a wonderfully written with a real "fairy tale" like feel to it. I enjoyed every page and didn't want it to end. Shadows on the moon has been described as Cinderella meet memiors of a Geisha and I really think that is a brilliant comparison to start with.
