One good way to enjoy the company of hummingbirds is planting a hummingbird garden. In addition to providing them a natural diet, a hummer garden is an excellent way to attract birds to your nearby feeder: since hummingbirds feed by sight on regularly-followed routes - called traplining - their inquisitive nature will quickly lead them to investigate any possible new source of food.

Attracting Hummingbirds

Hummingbirds are birds native to the Americas and constitute the biological family Trochilidae. They are among the smallest of birds, most species measuring 7.5-13 cm (3-5 in) in length. The smallest extant bird species is a hummingbird, the 5 cm (2.0 in) bee hummingbird weighing less than 2.0 g (0.07 oz).. They are known as hummingbirds because of the humming sound created by their beating ...
