

Pharmaceutical Economics And Public Policy

Pharmaceutical Economics And Public Policy

Pharmaceutical policy is a branch of health policy that deals with the development, provision and use of medications within a health care system. It embraces drugs (both brand name and generic), biologics (products derived from living sources, as opposed to chemical compositions), vaccines and natural health products.

Concept. Scarcity refers to a gap between limited resources and theoretically limitless wants .The notion of scarcity is that there is never enough (of something) to satisfy all conceivable human wants, even at advanced states of human technology.Scarcity involves making a sacrifice—giving something up, or making a tradeoff—in order to obtain more of the scarce resource that is wanted.
