History. The filter is named after Hungarian émigré Rudolf E. Kálmán, although Thorvald Nicolai Thiele and Peter Swerling developed a similar algorithm earlier. Richard S. Bucy of the University of Southern California contributed to the theory, leading to it sometimes being called the Kalman-Bucy filter. Stanley F. Schmidt is generally credited with developing the first implementation of ...

Dog lets out howls of terror as rescuer approaches after ...

The vast range of maximum lifespan differences between species provides convincing evidence that longevity is genetically influenced. An elephant lives about 10–20 times longer than a mouse, yet both animals have roughly the same number of lifetime heartbeats — the elephant at 30 per minute and the mouse at 300 per minute.

Professional Social Workers in Child Welfare Work: Research Addressing the Recruitment and

Retention Dilemma. Background; Recruitment and Retention Challenges

Child Welfare | Social Work Policy Institute

During the early twentieth century, the population of the Iron Range was among the most ethnically diverse in Minnesota. Tens of thousands of immigrants arrived from Finland, Austria-Hungary, Italy, Sweden, Norway, Canada, England, and over thirty other places of origin. These immigrants mined the ore that made the Iron Range famous and built its communities.

Earlier I asked a question about why I see so many examples use the varkeyword and got the answer that while it is only necessary for anonymous types, that it is used nonetheless to make writing code 'quicker'/easier and 'just because'.. Following this link ("C# 3.0 - Var Isn't Objec") I saw that var gets compiled down to the correct type in the IL (you will see it about midway down article).

c# - Will using 'var' affect performance? - Stack Overflow

Risk Factor for Neonatal AKI. The change in renal function that defines AKI should be thought of as the result of a combination of susceptibility factors and exposures. 44 Although neonates are subject to the same risk factors present in critically ill children of all ages, special consideration must be made to risk factors inherent to neonatal renal development and physiology.
