

Weight Gain Menopause Solution

Weight Gain Menopause Solution

It's easy to gain weight during menopause. That doesn't mean that you can't lose it. As you get older, your metabolism slows down. If your metabolism slows down, you have to eat less and exercise more to stay the same weight.

How can I reverse weight gain after menopause? | Menopause

Forget the hot flashes, mood swings and brain fog—if you're approaching or experiencing menopause and noticing extra weight gain, it can become your number one annoyance. Ask any of your girlfriends, workout buddies, or even close coworkers, and they'll probably have similar gripes to share about the "middle-age" spread that takes over during this time.

How To Prevent Weight Gain In Menopause And Feel Your Best

It is estimated that the average weight gain during menopause is about 10 to 15 pounds. Well, I must not be average, because I gained almost 30 pounds in less than a year when I slammed into menopause! Frustrated that I could not find a solution, I sacrificed myself as a human guinea pig and figured ...

The conventional medical mindset is that menopause is an estrogen deficiency disease resulting from ovarian failure. Women have been led to believe that at the slightest symptoms, they should run out and get estrogen replacement. While estrogen levels will decrease during menopause, the truth is, estrogen levels do not fall appreciably until after a woman's last period.

What Are the Symptoms of Estrogen Dominance? | Christiane ...

Menopause is not a disease, but rather the point in a woman's life at which she is no longer fertile, and menstrual periods have ceased. During this time, ovulation stops and estrogen hormones drop. Menopause can be accompanied by physical symptoms in some women, like hot flashes or night sweats.
